

bim handbook pdf

4D BIM, an acronym for 4D Building Information Modeling and a term widely used in the CAD industry, refers to the intelligent linking of individual 3D CAD components or assemblies with time- or schedule-related information. The use of the term 4D is intended to refer to the fourth dimension: time, i.e. 4D is 3D plus schedule (time). The construction of the 4D models enables the various ...

4D BIM - Wikipedia

Building information modeling (BIM) is a process involving the generation and management of digital representations of physical and functional characteristics of places. Building information models (BIMs) are files (often but not always in proprietary formats and containing proprietary data) which can be extracted, exchanged or networked to support decision-making regarding a building or other ...

Highlights We explore the project benefits of Building Information Modelling (BIM). We analyse 35 construction projects which report on the use of BIM. Cost reduction and control are the most commonly reported benefit. Time savings and enhanced communication are significant positive outcomes. Challenges from using BIM-related software produce negative benefits in some cases.

The project benefits of Building Information Modelling

The Construction Industry Council (CIC) is the representative forum for the professional bodies, research organisations and specialist business associations in the construction industry.
