Geometric Hahn-Banach theorem. One form of Hahn-Banach theorem is known as the Geometric Hahn-Banach theorem, or Mazur's theorem.. Theorem. Let  $K$  be a convex set having a nonempty interior in a real normed linear vector space  $X$ . Suppose  $V$  is a linear variety in  $X$  containing no interior points of  $K$ . Then there is a closed hyperplane in  $X$  containing  $V$  but containing no interior points of  $K$  ...

The envelope theorem is a result about the differentiability properties of the objective function of a parameterized optimization problem. As we change parameters of the objective, the envelope theorem shows that, in a certain sense, changes in the optimizer of the objective do not contribute to the change in the objective function.

Historia. El uso de las matemáticas en el análisis económico y social data del siglo 17. En ese tiempo, principalmente en universidades alemanas, surgió un estilo de enseñanza, el cual trataba específicamente la presentación detallada de información, ya que tenía una gran relación con la administración pública.
