Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment.. Typically, then, financial modeling

is understood to mean an exercise in either asset pricing or ...

1. In textbooks (e.g. Horngren et al., 2002, Atkinson et al., 2004) "transfer pricing" is commonly understood as the price that a company charges for a product, service, loan and the use of intangibles to a related organisation, including a division, subsidiary, affiliate or a joint venture. It acts as a device for the allocation of costs, income, revenues and profits to various subunits.
