Biochemistry, medical biochemistry and clinical biochemistry. 2. The Scope of Medical Biochemistry

Contribution Of Biochemistry To Medicine: Medical

Lipid metabolism is the synthesis and degradation of lipids in cells, involving the breakdown or storage of fats for energy. These fats are obtained from consuming food and absorbing them or they are synthesized by an animal's liver. Lipogenesis is the process of synthesizing these fats.

Fase di rendimento. Nella seconda fase, quella di rendimento, le due molecole di gliceraldeide-3-fosfato vengono trasformate in due molecole di piruvato con conseguente produzione di quattro molecole di ATP e due di NADH (per riduzione del NAD +), le quali permettono di rigenerare anche il pool di molecole riducenti presenti nella cellula. Questa seconda fase, dunque, vede un recupero di ...

Microplastics can be present in the environment as manufactured microplastics (known as primary microplastics) or resulting from the continuous weathering of plastic litter, which yields progressively smaller plastic fragments (known as secondary microplastics).

Microplastics in the environment: Challenges in analytical

Las enzimas [a] [b] son mol culas de naturaleza proteica que catalizan reacciones qu micas, siempre que sean termodin micamente posibles: una enzima hace que una reacci n qu mica que es energ ticamente posible (ver energ a libre de Gibbs), pero que transcurre a una velocidad muy baja, sea cin ticamente favorable, es decir, transcurra a mayor velocidad que sin la presencia de la enzima.
