IEEE Transactions on Neural Networks and Learning Systems publishes technical articles that deal with the theory, design, and applications of neural networks and related learning systems.

IEEE Transactions on Neural Networks and Learning Systems

Artificial Neural Networks (ANN) or connectionist systems are computing systems vaguely inspired by the biological neural networks that constitute animal brains. The neural network itself is not an algorithm, but rather a framework for many different machine learning algorithms to work together and process complex data inputs. Such systems "learn" to perform tasks by considering examples ...

Artificial neural network - Wikipedia

A recurrent neural network (RNN) is a class of artificial neural network where connections between nodes form a directed graph along a sequence. This allows it to exhibit temporal dynamic behavior for a time sequence. Unlike feedforward neural networks, RNNs can use their internal state (memory) to process sequences of inputs. This makes them applicable to tasks such as unsegmented, connected ...

Lyme disease is the most common tick-borne disease in North America, and is transmitted by blacklegged ticks carrying *Borrelia* bacteria. Infection by a tick takes at least 24 hours because of the time required for the bacteria to travel from the tick midgut to its salivary glands.

Since its launching in 1978, the journal *Fuzzy Sets and Systems* has been devoted to the international advancement of the theory and application of fuzzy sets and systems. The theory of fuzzy sets now encompasses a well organized corpus of basic notions including (and not restricted to) aggregation operations, a generalized theory of relations, specific measures of information content, a ...

IJCAS ::::: International Journal of Control, Automation

Automation, Control and Intelligent Systems (ACIS) provides readers with a compilation of stimulating and up-to-date articles within the field of intelligent systems. The focus of the journal is on high quality research that addresses paradigms, development, applications and implications in the field of intelligent systems. All research articles in *ACIS* will undergo rigorous peer ...

An In-Home, IoT Solution for Early Dementia Detection. The number of people with dementia is projected to double by 2030. To address this issue, researchers have developed an IoT health monitoring system to identify signs of Mild Cognitive Impairment.
