Special Issue - Food Process Engineering: Contemporary issues, Challenges, and Developing Solutions towards a Sustainable Future. As a part of multi-disciplinary team, food process engineers focus on the development of solutions addressing wide range of societal challenges. With the world population to reach 9.7 billion by 2050, cost effective innovative technological solutions are needed for ...

Process Safety Management for Storage Facilities

Process integration is a term in chemical engineering which has two possible meanings.. A holistic approach to process design which emphasizes the unity of the process and considers the interactions between different unit operations from the outset, rather than optimising them separately. This can also be called integrated process design or process synthesis.

Hydraulic fracturing (also fracking, fraccing, frac'ing, hydrofracturing or hydrofracking) is a well stimulation technique in which rock is fractured by a pressurized liquid. The process involves the high-pressure injection of 'fracking fluid' (primarily water, containing sand or other proppants suspended with the aid of thickening agents) into a wellbore to create cracks in the deep-rock ...
