

sales and market forecasting pdf

Forecasting is the process of making predictions of the future based on past and present data and most commonly by analysis of trends. A commonplace example might be estimation of some variable of interest at some specified future date. Prediction is a similar, but more general term. Both might refer to formal statistical methods employing time series, cross-sectional or longitudinal data, or ...

Demand Planning.Net: Best Practices Consulting in Sales

Forecasting is a necessary evil which can vary from "seat of your pants" to in-depth computer applications. The problem is unless your forecasting process is producing the data for planning that results in good returns, you are using the wrong process, OR, you are applying the process in a wrong manner.
