smaller pilot hole in one pass. This jig makes it possible to use either a regular pocket hole step drill or forstner bits. For instance, you can use a 1/4" forstner bit for the outer hole and a 1/8" twist drill for the inner hole to make pocket holes for smaller screws. An added benefit is the extremely clean cut you get from forstner bits.

To bore the pocket holes you will need to set the clamp position to ensure it holds the material securely. The Pocket Hole Jig has two positions for fitting the clamp. The first position (A) allows material thickness of 16mm to 18mm to be clamped. The second position (B) allows material from 18mm to 38mm thick to be clamped.

Pocket Holes Arrange all of your rail pieces so that the good side is down. You want to drill the pocket holes on the bad side. Every rail gets two pocket holes on each end and the top rails get a few pocket holes drilled vertically into the short side to attach the seat. Two on the long top rails and one in the middle of the short top rails ...
