Abstract Algebra Theory and Applications

Welcome. The Computing + Mathematical Sciences (CMS) Department is nestled in the heart of Pasadena on the beautiful Caltech campus. CMS is home to outstanding students and researchers who share a passion for science and engineering, as well as a drive to investigate the most challenging, fundamental problems in computation and information.

Caltech Computing + Mathematical Sciences

E-learning theory describes the cognitive science principles of effective multimedia learning using electronic educational technology.

E-learning (theory) - Wikipedia

Ray Solomonoff's theory of universal inductive inference is a theory of prediction based on logical observations, such as predicting the next symbol based upon a given series of symbols. The only assumption that the theory makes is that the environment follows some unknown but computable probability distribution. It is a mathematical formalization of Occam's razor and the Principle of Multiple ...
