Fusion power is a theoretical form of power generation in which energy will be generated by using nuclear fusion reactions to produce heat for electricity generation. In a fusion process, two lighter atomic nuclei combine to form a heavier nucleus, and at the same time, they release energy. This is the same process that powers stars like our Sun. Devices designed to harness this energy are ...

In this comment we address the preprint of Jha and Hirata (arXiv:1809.10316 [physics.chem-ph]) which claims "Numerical Evidence Falsifying Finite-Temperature Many-Body Perturbation Theory." We agree that finite difference differentiation of the exact grand potential is the correct way to verify the terms in the perturbation expansion.

In plasmas and electrolytes, the Debye length (also called Debye radius), named after Peter Debye, is a measure of a charge carrier's net electrostatic effect in solution and how far its electrostatic effect persists. A Debye sphere is a volume whose radius is the Debye length. With each Debye length, charges are increasingly electrically screened. Every Debye length, the electric potential ...

The "Beam and null switch step steerable antenna system" U.S. patent 4063250 by Richard C. Fenwick is a great explanation of time delay beam steering. The "phased array" antenna is a special case of the time delay steered antenna.

Le phénomène n'est découvert en 1911 par le physicien néerlandais Heike Kamerlingh Onnes et son équipe composée de Gilles Holst, Cornelis Dorsman, et Gerit Flim. Kamerlingh Onnes avait réussi à liquéfier pour la première fois de l'hélium en 1908, ce qui lui avait permis de mener des mesures physiques jusqu'à des températures de 1,5 K (-271,6 °C).

[ The story of the Tower of Babel is explained in Genesis 11 in just a few verses. The Babylonians wanted a

tower that would "reach to the heavens" so that they could be like God and that they would not need Him. God did not like the pride and arrogance in the hearts of the people.

Perhaps lunar miners could use something analogous to Bruce Damer's idea for asteroids of using CO in an enclosure warmed by the sunlight and iron and nickel extracted in attached 3D printer - with the PGM's as residue.

What Putin has now officially added to this arsenal are cruise missiles with an infinite range which could, in theory, destroy a command post in, say, the US Midwest, while being fired from the southern Indian Ocean or from the Tasman Sea.
